- 10 Days course
- Undergraduate and postgraduate students in Food Science, Human Nutrition, Dietetics and related fields
- Students from 15 universities
- No course fee

- Lectures
- Group projects
- Presentations
- Class discussions
- Poster session
- Continuous assessment
- Internet platform
- 6 ECTS credits

Unit 1 Risk Assessment

- Risk analysis
- Chemical risk assessment, cases
- Microbiological risk assessment
- Listeria and RTE foods
- Predictive microbiology
- New preservation techniques
- Novel food - GMO

Unit 2 Risk-Benefit Analysis

- Micronutrients, fortification levels
- Functional foods, scientific evidence
- Health claims
- Risk-benefit management, cases
- Communication to consumers

Unit 3 Risk Management Strategies

- Risk management options
- Approval and labeling systems
- International trade, organisations
- Implementation of risk management
- Risk management options applied to import chains, cases
